

TERMS AND CONDITIONS – AIR CONDITIONER REBATE

1. Rebates of \$100 for eligible refrigerative air conditioners (including reverse cycle systems) with a cooling capacity less than 6kW, or \$150 for eligible refrigerative air conditioners (including reverse cycle systems) with a cooling capacity 6kW and above, are available to eligible householders, businesses and other organisations under the Regional Energy Efficiency Program.
2. To apply for the Air Conditioner Rebate, you must complete in full and sign the application form and attach a copy of a receipt or invoice for the air conditioner, which clearly shows the model name. You must also attach a copy of a local government rates notice or other form of identification (e.g. electricity bill) showing that you own or lease the property where the air conditioner is installed.
3. The air conditioner must have an **energy rating of five (5) stars and above** to be eligible for the rebate. You can check the energy rating of the air conditioner at www.energyrating.gov.au.
4. The rebate is only available to householders, eligible businesses and other organisations located within local government shires outside of the South West electricity grid as per the map shown on this form.
5. The rebate is not available to commercial mineral exploration or processing operations, including associated dedicated workers' accommodation.
6. Businesses and other organisations must have an Australian Business Number (ABN) to be eligible for the rebate.
7. The rebate is only available if the property where the air conditioner is installed is an approved, permanent building. It is not available for mobile dwellings, mobile businesses or other mobile facilities.
8. The rebate is only available if the building where the air conditioner is installed has ceiling insulation.
9. The rebate is limited to two (2) per residential dwelling and two (2) per commercial property.
10. The rebate is only available for air conditioners purchased after 7 December 2006 and before 30 June 2010, or until the funding available for the Regional Energy Efficiency Program is fully allocated.
11. The rebate must be claimed within six (6) months of the air conditioner being purchased.
12. All equipment, including installation, must meet relevant standards and regulations.
13. The Sustainable Energy Development Office will be the sole arbitrator in determining if the requirements of the rebate are met and the level of rebate that is applicable.
14. The Sustainable Energy Development Office reserves the right to change the terms and conditions of the rebate at any time.
15. The Sustainable Energy Development Office and the Australian Greenhouse Office accept no representations whatsoever for the performance of items for which the rebate is provided.
16. The Sustainable Energy Development Office reserves the right to publish information about the number of rebate applications approved and air conditioners installed as a result of the rebate. Any private or confidential information provided will be kept confidential.

FURTHER INFORMATION

For further details on the Air Conditioner Rebate, please contact the Energy Smart Line on 1300 658 158. The Energy Smart Line also provides advice on ways to save energy, including ways to operate and maintain your new air conditioner. You can also visit the Sustainable Energy Development Office website at www.sedo.energy.wa.gov.au for further information.

For other information on ways to reduce greenhouse gas emissions, visit the Australian Greenhouse Office website at www.greenhouse.gov.au.

OTHER OFFERS AVAILABLE

Why not take advantage of the other offers available under the Regional Energy Efficiency Program, including rebates for energy efficient fridges and freezers, ceiling insulation and controllers of high energy-using equipment. There are also free energy-saving compact fluorescent lamps available. Call the Energy Smart Line on 1300 658 158 for more details.

The Regional Energy Efficiency Program is supported by the Australian Government through the Renewable Remote Power Generation Program. The program was developed and is administered by the WA Sustainable Energy Development Office.

ABOUT THE AIR CONDITIONER REBATE

The Air Conditioner Rebate is part of the Regional Energy Efficiency Program, which is aimed at reducing energy use in remote areas of Western Australia.

The rebate is available to eligible householders, businesses and other organisations located in shires outside the main electricity grid, as shown in the map below

The rebate is restricted to these 'off-grid' areas as funding for the program is sourced from diesel fuel excise paid for public electricity generation in these locations.

The State and Australian Governments are working together to channel the funds back into the regions where the increased use of sustainable energy products and practices offers significant benefits.

HOW CAN I GET THE REBATE?

The rebate can be claimed on all refrigerative air conditioners (including reverse cycle systems) with a **5 STAR ENERGY RATING AND ABOVE** for cooling.

The level of rebate varies depending upon the size of the air conditioner:

- For refrigerative systems with a cooling capacity less than 6kW, the rebate is \$100
- For refrigerative systems with a cooling capacity 6kW and above, the rebate is \$150.

To be eligible for the rebate, the building in which the air conditioner is installed must have ceiling insulation.

See over for full terms and conditions.

WHY SAVE ENERGY?

Apart from the direct savings you'll receive when you claim the rebate, choosing an Energy Smart air conditioner will save you money over the longer term through reduced running costs.

Air conditioners with a 5 star energy rating and above use less energy and are cheaper to run than lower star rated models of a similar cooling capacity or size, which means you'll save on running costs over the life of the system.

Saving energy also helps to reduce greenhouse gas emissions. Global warming has the potential to impact on all animals, plants and people living on the earth. By saving energy you'll help to protect the environment.

REBATE FORM – AIR CONDITIONERS

Type of applicant *(please tick)*

Householder

Name _____

Telephone _____

Business or other organisation

Business Name _____

ABN _____

Contact Name _____

Telephone _____

Address

Property address where the air conditioner is installed

Postal address *(if different)*

Size of air conditioner purchased *(please tick)*

Less than 6kW cooling capacity

6kW and above cooling capacity

Applicant certification *(please tick)*

I have read and agree to the Terms and Conditions on this form

I have attached a copy of a receipt or invoice for the air conditioner, showing the full model name

I have attached a copy of a local government rates notice or other form of identification (e.g. electricity bill), showing that I own or lease the property where the air conditioner is installed

I confirm that the air conditioner has been installed at the address identified on this form

I confirm that the building where the air conditioner is installed has ceiling insulation

I agree to be contacted in the future for information about my energy use *(optional)*
