

## TERMS AND CONDITIONS – CONTROLLER REBATE

1. A rebate of 50% of the cost of a controller, up to a maximum of \$50 per item is available to eligible householders, businesses and other organisations under the Regional Energy Efficiency Program.
2. To apply for the Controller Rebate, you must complete in full and sign the application form and attach a copy of a tax invoice for the controller which clearly shows the model name. You must also attach a copy of a local government rates notice or other form of identification (e.g. electricity bill) showing that you own or lease the property where the controller is installed.
3. The controller must be hard wired and control high energy consuming equipment that is commonly left on when not required, such as lighting banks, air conditioning, fans, etc.
4. The rebate is only available for separate controllers used to control existing equipment. It is not available for controllers built into equipment.
5. The controller must be installed by a qualified electrician to be eligible for the rebate.
6. The rebate is only available to householders, eligible businesses and other organisations located within local government shires outside of the South West electricity grid as per the map shown on this form.
7. The rebate is not available to commercial mineral exploration or processing operations, including associated dedicated workers' accommodation.
8. Businesses and other organisations must have an Australian Business Number (ABN) to be eligible for the rebate.
9. The rebate is only available if the property where the controller is installed is an approved, permanent building. It is not available for mobile dwellings, mobile businesses or other mobile facilities.
10. The rebate is limited to four (4) per residential dwelling and ten (10) per commercial property.
11. The rebate is only available for controllers purchased after 7 December 2006 and before 30 June 2010, or until the funding available for the Regional Energy Efficiency Program is fully allocated.
12. The rebate must be claimed within six (6) months of the controller being purchased.
13. All equipment, including installation, must meet relevant standards and regulations.
14. The Sustainable Energy Development Office will be the sole arbitrator in determining if the requirements of the rebate are met and the level of rebate that is applicable.
15. The Sustainable Energy Development Office reserves the right to change the terms and conditions of the rebate at any time.
16. The Sustainable Energy Development Office and the Australian Greenhouse Office accept no representations whatsoever for the performance of items for which a rebate is provided.
17. The Sustainable Energy Development Office reserves the right to publish information about the number of rebate applications approved and controllers installed as a result of the rebate. Any private or confidential information provided will be kept confidential.

## FURTHER INFORMATION

For further details on the Controller Rebate, please contact the Energy Smart Line on 1300 658 158. The Energy Smart Line also provides advice on ways to save energy. You can also visit the Sustainable Energy Development Office website at [www.sedo.energy.wa.gov.au](http://www.sedo.energy.wa.gov.au) for further information.

For other information on ways to reduce greenhouse gas emissions, visit the Australian Greenhouse Office website at [www.greenhouse.gov.au](http://www.greenhouse.gov.au).

## OTHER OFFERS AVAILABLE

Why not take advantage of the other offers available under the Regional Energy Efficiency Program, including rebates for energy efficient air conditioners, fridges and freezers and ceiling insulation. There are also free energy-saving compact fluorescent lamps available. Call the Energy Smart Line on 1300 658 158 for more details.

*The Regional Energy Efficiency Program is supported by the Australian Government through the Renewable Remote Power Generation Program. The program was developed and is administered by the WA Sustainable Energy Development Office.*

## ABOUT THE CONTROLLER REBATE

The Controller Rebate is part of the Regional Energy Efficiency Program, which is aimed at reducing energy use in remote areas of Western Australia.

The rebate is available to eligible householders, businesses and other organisations located in shires outside the main electricity grid, as shown in the map below.

The rebate is restricted to these 'off-grid' areas as funding for the program is sourced from diesel fuel excise paid for public electricity generation in these locations.

The State and Australian Governments are working together to channel the funds back into the regions where the increased use of sustainable energy products and practices offers significant benefits.

## HOW CAN I GET THE REBATE?

The rebate is available for 'hard wired' controllers, such as timers, push button timer switches and occupancy sensors used to control high energy consuming equipment that is commonly left on when not required, such as lighting banks, air conditioning, fans, etc.

The rebate is 50% of the cost of the controller, up to a maximum of \$50 per item. Rebates are only available for separate controllers for existing equipment (they are not available for controllers built into equipment).

The controllers must be **installed by a qualified electrician** to be eligible for the rebate.

See over for full terms and conditions.

## WHY USE CONTROLLERS?

In many situations, controllers have the potential to save significant amounts of energy, particularly in the workplace where equipment can be left on for long periods of time when not required.

Apart from the direct savings available when you claim the rebate, using a controller will save money over the longer term through reduced energy costs.

Saving energy also helps to reduce greenhouse gas emissions. Global warming has the potential to impact on all animals, plants and people living on the earth. By saving energy you'll help to protect the environment.

## REBATE FORM – CONTROLLERS

Type of applicant *(please tick)*

Householder \_\_\_\_\_

Name \_\_\_\_\_

Telephone \_\_\_\_\_

Business or other organisation

Business Name \_\_\_\_\_

ABN \_\_\_\_\_

Contact Name \_\_\_\_\_

Telephone \_\_\_\_\_

Address

Property address where the controller is installed

\_\_\_\_\_  
\_\_\_\_\_

Postal address *(if different)*

\_\_\_\_\_  
\_\_\_\_\_

Applicant certification *(please tick)*

I have read and agree to the Terms and Conditions on this form

I have attached a copy of a receipt or invoice, showing the full model name

I have attached a copy of a local government rates notice or other form of identification (e.g. electricity bill), showing that I own or lease the property where the controller is installed

I confirm that the controller has been installed at the address identified on this form

I agree to be contacted in the future for information about my energy use *(optional)*

\_\_\_\_\_  
*(Applicant Signature)*

\_\_\_\_\_  
*(Date)*

Electrician details *(must be installed by a qualified electrician)*

Name \_\_\_\_\_

Business Name \_\_\_\_\_

Telephone \_\_\_\_\_

Electrician certification *(please tick)*

The installation meets relevant standards and regulations

\_\_\_\_\_  
*(Electrician Signature)*

\_\_\_\_\_  
*(Date)*
