

TERMS AND CONDITIONS – INSULATION REBATE

1. A rebate of 30% of the cost of ceiling insulation, including installation, up to a maximum of \$400 is available to eligible householders under the Regional Energy Efficiency Program.
2. To apply for the Insulation Rebate, you must complete in full and sign this application form and attach a copy of a receipt or invoice for the insulation, showing full details of the insulation, including installation. You must also attach a copy of a local government rates notice or other form of identification (e.g. electricity bill) showing that you own or lease the property where the insulation is installed.
3. The rebate is only available for **ceiling insulation** installed in residential dwellings constructed before 1 July 2003.
4. The insulation must have a thermal resistance rating of **R3.0 or above** to be eligible for the rebate.
5. The insulation must be **installed by a qualified insulation contractor** to be eligible for the rebate.
6. The rebate is only available to householders located within local government shires outside of the South West electricity grid as per the map shown on this form.
7. The rebate is only available if the property where the insulation is installed is an approved, permanent residential dwelling. It is not available for mobile dwellings or commercial properties.
8. The rebate is limited to one (1) per residential dwelling.
9. The rebate is only available for insulation purchased after 7 December 2006 and before 30 June 2010, or until the funding available for the Regional Energy Efficiency Program is fully allocated.
10. The rebate must be claimed within six (6) months of the insulation being purchased.
11. The insulation, including installation, must meet relevant standards and regulations.
12. The Sustainable Energy Development Office will be the sole arbitrator in determining if the requirements of the rebate are met and the level of rebate that is applicable.
13. The Sustainable Energy Development Office reserves the right to change the terms and conditions of the rebate at any time.
14. The Sustainable Energy Development Office and the Australian Greenhouse Office accept no representations whatsoever for the performance of items for which a rebate is provided.
15. The Sustainable Energy Development Office reserves the right to publish information about the number of rebate applications approved and insulation installed as a result of the rebate. Any private or confidential information provided will be kept confidential.

FURTHER INFORMATION

For further details on the Insulation Rebate, please contact the Energy Smart Line on 1300 658 158. The Energy Smart Line also provides advice on ways to save energy, including ways to choose and install your insulation. You can also visit the Sustainable Energy Development Office website at www.sedo.energy.wa.gov.au for further information.

For other information on ways to reduce greenhouse gas emissions, visit the Australian Greenhouse Office website at www.greenhouse.gov.au.

OTHER OFFERS AVAILABLE

Why not take advantage of the other offers available under the Regional Energy Efficiency Program, including rebates for energy efficient air conditioners, fridges and freezers and controllers of high energy-using equipment. There are also free energy-saving compact fluorescent lamps available. Call the Energy Smart Line on 1300 658 158 for more details.

The Regional Energy Efficiency Program is supported by the Australian Government through the Renewable Remote Power Generation Program. The program was developed and is administered by the WA Sustainable Energy Development Office.

ABOUT THE INSULATION REBATE

The Insulation Rebate is part of the Regional Energy Efficiency Program, which is aimed at reducing energy use in remote areas of Western Australia.

The rebate is available to eligible householders located in shires outside the main electricity grid, as shown in the map below.

The rebate is restricted to these 'off-grid' areas as funding for the program is sourced from diesel fuel excise paid for public electricity generation in these locations.

The State and Australian Governments are working together to channel the funds back into the regions where the increased use of sustainable energy products and practices offers significant benefits.

HOW CAN I GET THE REBATE?

The rebate can be claimed on all **ceiling insulation** installed in homes built before 1 July 2003. The insulation must have a thermal resistance rating of **R3.0 or above** to be eligible for the rebate.

The amount you can claim is 30% of the cost of the ceiling insulation, including installation, up to a maximum of \$400.

The insulation must be **installed by a qualified insulation contractor** to be eligible for the rebate.

See over for full terms and conditions.

WHY INSTALL INSULATION?

Insulation acts as a barrier to heat flow. It can make your home more comfortable by reducing the amount of heat entering in hot conditions and the amount of warmth escaping in cold conditions.

By creating a more comfortable home, you'll find that you won't need to rely so much on expensive air conditioning or heating. Not only will you save money upfront when you claim the rebate, you'll also save on energy costs over the longer term.

Saving energy also helps to reduce greenhouse gas emissions. Global warming has the potential to impact on all animals, plants and people living on the earth. By saving energy you'll help to protect the environment.

REBATE FORM – INSULATION

Applicant details

Name _____

Property address where the insulation is installed

Postal address (if different)

Telephone _____

Applicant certification (please tick)

- I have read and agree to the Terms and Conditions on this form
- I have attached a copy of a receipt or invoice for the insulation, showing full details of the insulation, including installation
- I have attached a copy of a local government rates notice or other form of identification (e.g. electricity bill), showing that I own or lease the property where the insulation is installed
- I confirm that the insulation has been installed at the address identified on this form
- I confirm that the property where the insulation is installed was constructed prior to 1 July 2003
- I agree to be contacted in the future for information about my energy use (optional)

(Applicant Signature) (Date)

Installer details (must be installed by a qualified insulation contractor)

Name _____

Business Name _____

Telephone _____

Installer certification (please tick):

- The insulation has a thermal resistance rating of R3.0 or above
- The insulation has been installed to relevant standards and regulations

(Installer Signature) (Date)

Please send form and attachments to:

Sustainable Energy Development Office, Level 9 Governor Stirling Tower, 197 St Georges Terrace, PERTH WA 6000 or fax to 9420 5699.
